EDUCATION

VIT Bhopal University, Bhopal

B.Tech in Computer Science and Engineering

Sept 2024 – Present

CGPA: 8.30 / 10.0 (through Semester 6)

Manav Rachna International School, Faridabad

CBSE Class XII

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, Java, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Recharts, Three.js, React Three Fiber

Backend and APIs: Node.js, Express.js, REST APIs, Prisma

Databases: PostgreSQL, Supabase, Firebase

AI and Integrations: Gemini API, Groq LLM, YouTube Data API, Reddit API, Telegram, Resend

Testing and Security: Playwright, node:test, Cloudflare Turnstile, rate limiting, Helmet, CORS, Row Level Security

CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems

Tools and Deployment: Git, GitHub, CI, VS Code, Cursor, Vercel, Render, Netlify

PROJECTS

VoxTube: AI-Powered Comment Analyzer

[Live](#) | [GitHub](#)

React 19, Vite, Express, Supabase, Gemini API

- Built a full-stack app that turns up to 300 YouTube or 150 Reddit comments per link into sentiment and category dashboards; deployed on Vercel, Render and Supabase.
- Integrated the Gemini API for batched comment classification with output validation, retry and a fallback model; Supabase caching cut a repeat request from about 50 s to 0.6 s in my test run.
- Secured the API with Cloudflare Turnstile, rate limiting, a CORS allowlist and Helmet, backed by 81 server tests and 8 client tests.

Munim: Inventory, Billing and AI Assistant

[Live](#) | [GitHub](#)

Next.js, TypeScript, PostgreSQL, Prisma, Groq LLM, Telegram

- Built and deployed a bilingual (English/Hindi) shop-management app covering stock, sales, GST invoice PDFs, customer balances and profit reports; staff log stock with photos and never see prices.
- Made stock concurrency-safe with an append-only ledger and atomic updates (50 parallel sales against 10 units sold exactly 10). Secured multi-tenant access with OTP login, argon2id, four roles and a cross-shop attack test suite.
- Built a Hinglish AI assistant (text, voice, Telegram) with schema validation and a confirmation step; 0 unconfirmed wrong writes across 257 evaluated commands.

360° Interactive Campus Tour

[Live](#) | [GitHub](#)

Marzipano, Pannellum, Unity, JavaScript

- Built a 360-degree panorama viewer with interactive hotspots, smooth scene transitions and location-based navigation for a VR-ready campus experience.

Personal Portfolio

[Live](#) | [GitHub](#)

Next.js 16, React 19, TypeScript, Tailwind CSS, Zod, Resend

- Built a full-stack portfolio with project case studies, live LeetCode, Codeforces, CodeChef and GitHub stats (cached, with fallbacks), and an interactive system-design simulation for each project.
- Added a contact form with a honeypot field and per-IP rate limiting, sending email through Resend; responsive on phone and desktop, deployed on Vercel with continuous deployment from GitHub.

HACKATHONS AND COMPETITIVE PROGRAMMING

- The Ken's Great Rewiring:** Cleared Rounds 1 and 2..
- Codex India Hackathon 2026:** Reached the finals.
- Adobe University Hackathon 2026:** Cleared Round 2.
- Bharatiya Antariksh Hackathon 2026:** Participant.
- Competitive programming:** Solved 220+ DSA problems and competed in contests on LeetCode, Codeforces and CodeChef.

CERTIFICATIONS

- Machine Learning A-Z [2026]: ML, DL, AI with AWS, Python and R, Udemy
- Introduction to Internet of Things (Elite), NPTEL / Swayam, IIT Kharagpur
- TCS iON Career Edge – Young Professional, Tata Consultancy Services
- Foundation Course on AI Readiness, IICT and AI Skills House, in partnership with Google and YouTube
- Intro to AR/VR/MR/XR: Technologies, Applications and Issues, University of Michigan (Coursera)
